

Do NOT allow our news to be made and censored by a single corporation or two to six corporations that may not be owned by a United States corporation ie. German, Japanese, ect. The news in The United States under a democracy must be controlled by The People of The United States of America, not a few corporations who do not have to report the real or truthful news when that news is detrimental to the corporataion which is reproting the "news" ie. General Electric not reporting on current and or historical nuclear reactor accidents and dangers of nuclear accidents.

Comments for these rule changes must be being asked for by The FCC on all the mass media channels and print media during the daytime in all media areas in The United States of America. The current FCC procedure of limiting sollicitaion for these comments is indicative of totalitarian governments.
